**Navigating the AI Era in Education: in all
Grade Levels: Leveling Up Teaching and
Learning with AI**

REGISTER HERE: [HTTPS://CVENT.ME/PAKR8D](https://cvent.me/pakr8d)

We are no longer at the starting line of AI in education, we are well on our way. Whether you're just beginning with AI or well on your way with AI tools, this session will help you take your next steps that will bring qualitative change to classroom practices. This session will touch on ways teachers can use AI to support instruction, reimagine assessment, manage content, and provide targeted feedback. We will look at how every K-12 educator can help students develop the essential skills they'll need to navigate AI, including curiosity, critical thinking, collaboration, ethical awareness, and responsible tool use. This session blends practical classroom strategies with big-picture vision. You'll leave with ideas to improve your practice, walk away with tools ready for use, and to prepare your students ready to engage with AI in thoughtful, intentional, and empowering ways. The session draws from current research and *The Artificial Intelligence Playbook* (Fisher, Frey & Hargrave, 2025) and *Teaching Students to Use AI Ethically and Responsibly* (Khan, Marshall, Fisher, Frey & Hargrave, 2025).
